in linkedin.com/in/basma-gouam

PROFESSIONAL PROFILE

Bachelor's graduate in Data Science from the Polydisciplinary Faculty of Safi, passionate about data analysis, machine learning, and the development of predictive models. Equipped with strong skills in modeling, optimization, and programming, seeking an opportunity (internship or first job) to contribute to high-value analytical projects.

PROFESSIONAL EXPERIENCE

Data Science & AI Intern

July 2026 – August 2026

Marsa Maroc – Safi, Morocco

- Designed an AI-based decision support system for optimizing port operations, combining Machine Learning and Generative AI (LLM/RAG).
- Developed Machine Learning models based on historical operational data to predict unloading times and optimize logistics planning.
- Deployed a virtual assistant (Kimi / RAG) to answer queries on procedures and technical documentation.

Keywords / Technologies: Python, Machine Learning, Generative AI, LLM (Kimi), RAG / NLP, Data Processing, Decision Support Systems.

Web Development Intern

July 2025 – August 2025

mamda-mcma – Safi, Morocco

- Developed a web application for online claims management: designed and deployed a digital insurance system to automate the filing, tracking, and resolution of client cases.
- Modeled and managed the relational database to optimize information structuring.

Keywords / Technologies: PHP, MySQL, JavaScript, Ajax, HTML/CSS, Bootstrap, Agile Methodologies.

ACADEMIC PROJECTS

Automatic Sorting via Computer Vision & FPGA (Final Year Project)

March 2026 – June 2026

Real-time system for recognizing and automatically sorting geometric shapes. Image processing (Python, OpenCV) for detection and classification, synchronized with an FPGA board (VHDL) to control servomotors and the conveyor belt.

LoanGuard ML – Credit Risk Prediction

March 2026 – April 2026

- Development & Optimization: built a robust Machine Learning pipeline (Python, Scikit-learn) to predict customer credit risk, validated with a Gradient Boosting Classifier model.
- Real-Time Deployment: designed and deployed an interactive web application with Streamlit for instant credit approval decisions.

Sales & Profit Dashboard (Excel)

September 2025

Designed a dynamic dashboard in MS Excel to transform raw data into key performance indicators (KPIs) and analyze performance trends.

EDUCATION

Bachelor's Degree in Data Science

September 2023 – July 2026

Cadi Ayyad University – Faculty of Applied Sciences of Safi, Morocco

SKILLS

Data Science & AI: Machine Learning & Deep Learning (Scikit-learn, TensorFlow, Classification, Regression, Random Forest, Neural Networks), GenAI/LLM (Kimi, RAG).

Programming & Web: Python, C/C++, Java, PHP, HTML, CSS, JavaScript, Laravel.

Databases: MySQL, NoSQL, PL/SQL.

Tools & DevOps: Git, GitHub/GitLab, Docker, Power BI, MS Office (Word, Excel, PowerPoint).

Project Management & Soft Skills: MS Project, Agile Methodologies, Team Management & Leadership.

LANGUAGES

French: Professional (B2)

English: Fluent (C1)

Arabic: Native language
